PROFILE

I am a full-stack web developer with several years of hands-on experience in building and deploying dynamic web applications. My strong foundation ensures that I deliver high-quality, maintainable code. I thrive in fast-paced environments, continuously learning and adapting to new technologies to meet project needs and drive innovation.

PROFESSIONAL EXPERIENCE

Web Developer
Gordy's Bar and Grill
- Developed and launched a responsive website for Gordy's Restaurant, enhancing user experience and increasing online reservations by 25% within the first month.
- Optimized website performance, reducing load times by 50% and improving mobile traffic by 35%.
- Integrated a user-friendly content management system, enabling staff to easily update menus and promotions, saving an estimated 5 hours per week in administrative tasks.

EDUCATION

College of Southern Maryland
- Collaborated on team-based projects, including software engineering capstone projects, to design, develop, and test complex systems.
- Developed and implemented various software projects, applying core principles of computer science across multiple programming languages.

Scrimba Web Developer Bootcamp 🔗
- Built and deployed multiple full-stack projects during the bootcamp through hands-on experience.
- Participated in collaborative coding challenges and peer reviews, enhancing teamwork skills and receiving positive feedback for problem-solving and code quality from instructors and peers.

PROJECTS

BlossomAI
- Developed a real-time progress tracking tool for coding projects, utilizing GitHub integration to monitor commits, pull requests, and issues, resulting in a increase in user's productivity.
- Enhanced public visibility features by integrating live project updates and progress tracking on social media platforms, which will boost community engagement and encourage transparency in the development process.
- Implemented OpenAI's chat completions API to automatically generate shareable content from coding activities, cutting manual reporting time in half.

Audiophile
- Developed a modern e-commerce platform for high-end audio equipment using React and a headless CMS, enhancing user experience with a clean, intuitive design.
- Integrated secure payment gateways and created detailed product pages, ensuring seamless and secure transactions for users.
- Optimized platform performance to handle high traffic and maintain a responsive shopping experience, improving overall user satisfaction.

SKILLS

Programming Languages
JavaScript, Typescript, Python

Frameworks and Others.
NextJS, React, GraphQL, NodeJS, TailwindCSS, Prisma, DrizzleORM, MongoDB, Postgres, Jest, Cypress
